Does thornova solar produce solar cells in Indonesia?

United States manufacturer Thornova Solar has started producing solar cells and modules in Indonesia. CEO William Sheng says the move is in line with changing US market regulations. It plans to supply customers with cells and modules from Indonesia, Laos or the US by mid-2025. From pv magazine Global

#### Where is thornova solar based?

Fremont, California-headquartered Thornova Solar is prioritizing serving the United States market with a steady supply of solar modules. That's precisely why the company has started manufacturing operations on the island of Batam in Indonesia.

#### What happened to thornova solar?

With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar. Our latest high-density PV panels stand for exceptional electricity production and are used in applications ranging from floating solar systems to lowlands and alpine altitudes.

#### Are thornova solar modules reliable?

Our management team has extensive experience in the solar industry and has established relationships with business partners in the U.S. and around the world. Thornova solar modules have proven reliability and performance, with up to 30-year performance guarantees.

#### Why are Sunova solar & thornova solar co-existing?

In the coming months, our two brands --Sunova Solar and Thornova Solar-- will co-exist in our corporate communications as a reminder of our origins, an expression of our development, and a confirmation of our commitment to our customers to provide the on-going best technical support.

California-headquartered Thornova Solar has started production of solar cells and modules at a factory on the Indonesian island of Batam. Thornova Solar's 2.5 GW production lines will supply the US market with modules ranging from 400 W to 720 W, using passivated emitter and rear cell (PERC) and n-type technology.

### Cabo Verde pt thornova solar

It"s a highly reputable installer, 2nd oldest in our province, and they seemed to have "just" made the switch to want to go to Thornova for some reason. Everyone seems really sold on the 30 year power production warranty. It's the only reason i"ve been open to their highly unusual suggestions of Thornova with Growatt.

Each factory of Thornova adopts fully automated production lines with the same equipment as Tier 1 suppliers. In manufacturing, we run triple EL (Electroluminescence) testing to better check each panel"s hidden micro-crack. Every Thornova panel passes VDE test, Triple IEC test, Ammonia test, Sandblast, UV test, and PID test.
