

# Can you make money by installing solar power on your roof

Can you get free solar panels on a roof?

Companies offered to pay to lease your roof from you for 20-25 years and, in exchange, would install and maintain solar PV panels on it. You didn't have to pay upfront for the panels, and would also benefit from the free electricity produced by the system. But there are very few free solar panel schemes available now.

Are solar panels worth it if you have a south-facing roof?

Solar PV panels are worth considering if you have a mainly south-facing roof with little or no shade and you're not thinking of moving home in the near future. How much energy you could produce with solar panels - and therefore how much money you could make or save - will depend on:

Should you install solar panels on your roof?

Having solar panels installed on your roof is obviously on a much smaller scale. That's not to say having a smaller solar panel system installed at your home will not provide you with any benefits. You can reap the financial rewards for the next 25 years. The government's Feed-In Tariff system can also earn you up to £7250.

How much does a solar panel installation cost?

The average residential solar panel installation consists of either 12 or 16 solar panels. The average cost of a solar panel installation in the UK is between £5000 and £8000. If you have three people or more living in your home, then most professional solar panel installers will recommend you install a 3kWh solar panel system.

Are solar panels a good investment?

Installing solar panels at your home or business premises can reduce your carbon footprint and earn you money. Not only do solar PV systems cut your energy bills, they can also actually bring in profit through the government's incentive schemes. We use smart data so you can compare energy prices in less than a minute.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

If you're thinking about replacing your roof--like millions of other homeowners every year in America--you may also be considering adding solar at the same time. In fact, an average of 2.3 million single-family, detached homes ...
