

Cayman Islands solar rapid shutdown

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

What is the first commercial solar project in Cayman?

The 20 acre 5MW Solar Farm located in Bodden Town is the first commercial solar project in Cayman. Completed in 2017, this solar farm was also the first Independent Power Producer (IPP) in Grand Cayman, selling electricity to CUC through a Power Purchase Agreement (PPA).

Are solar panels duty-free in Cayman?

However, renewable energy equipment, such as solar panels, are in fact duty-free for residential homeowners. Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery.

What to do in Cayman if there is no sun?

Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery. These rechargeable lithium-ion batteries are wall mounted and can be stored either outside your home or inside your garage.

What is rapid shutdown & why is it important?

It was first implemented by the NEC in 2014, along with associated guidelines. Rapid shutdown guidelines require that a solar energy system has a fast and easy method for cutting off energy or electricity running through the system as a safety precaution. Importance of Rapid Shutdown

Does a solar system have to follow NEC rapid shutdown requirements?

Installation in a state where the 2014 or newer versions are in force will involve a system having to follow NEC rapid shutdown requirements in order to pass final inspection. Specific Requirements for Rapid Shutdown The solar shutdown procedure must meet several specific criteria to comply with NEC.

Specifically, the proliferation of non-DC-optimised systems without integrated rapid shutdown is putting firefighters and first responders at risk, according to industry commentators.
