Where is Central African Republic launching a new solar park?

BANGUI, November 17, 2023 - Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui. The park will supply electricity to 250,000 persons in the capital, almost doubling the country's electricity generation capacity.

Will Central African Republic have electricity by 2030?

By 2030, almost half of the population of the Central African Republic should have access to electricity, compared to only 16% at present. Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui.

Why is Central African Republic investing in electricity?

With an electrification rate of 35% in Bangui, 8% in the main provincial cities and towns, and only 2% in rural communes, the Central African Republic has invested in the energy sector as an engine of development to increase access to electricity and promote sustainable growth.

What is the Danzi solar park?

The Danzi solar park is the product of a partnership between the government and the World Bank and was made possible by grant funding from the World Bank's International Development Association (IDA).

In a landmark move towards sustainable development, the Central African Republic inaugurated the Danzi solar park, a 25-megawatt solar facility equipped with battery storage, situated just 18 kilometers from the capital, Bangui.

The Sakai solar photovoltaic power plant in the Central African Republic, funded and constructed by China, has started supplying electricity to factories, schools, and households in the capital city of Bangui, offsetting around 30% of its total electricity demand.

With just three percent of its population having reliable access to power, the Central African Republic has one of the lowest rates of electrification in the world. In addition to limiting the ...
