

How does Chile generate electricity?

In 2020, fossil fuels provided roughly half of Chile's installed electrical capacity and power generation; additional electricity was generated by hydro (26.5%), solar (9.8%, up from 8% in 2019), wind (7.1%, up from 6%) and other renewables including biomass and geothermal energy (roughly 5%).

Where does Chile get its energy from?

This page is part of Global Energy Monitor's Latin America Energy Portal. Chile derives roughly two thirds of its total energy supply from fossil fuels, with oil, coal and natural gas all playing key roles; biofuels, together with smaller amounts of hydro, wind and solar, account for the remainder.

How does Chile benefit from solar energy?

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

Will Chile achieve net-zero emissions by 2050?

Last December, Chile's centre-right government published the country's first energy transition strategy, which provided targets for achieving net-zero emissions by 2050, including accelerating solar, wind and geothermal energy across the country.

What type of electricity is used in Chile?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Chile: How much of the country's electricity comes from nuclear power?

Does Chile have a solar thermal tower?

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the pillars of the country's ambitious green energy program that began in 2019 and aims to completely replace fossil fuels by 2040.

Duke Energy announced the sale of its assets in the six countries to I Squared Capital and the sale of its Brazil assets to China Three Gorges Corp. in Oct. 2016. "We are pleased to have closed this transaction so quickly," said Duke Energy chairman, president and CEO Lynn Good. "The sale of the Brazilian assets is expected to be completed in the near ...
