

Chile paragon solar

Why is solar power important in Chile?

Solar power in Chile is an increasingly important source of energy. Total installed photovoltaic (PV) capacity in Chile reached 8.36 GW in 2023. Solar energy provided 19.9% of national electricity generation in Chile in 2023, compared to less than 0.1% in 2013.

How much does a solar power plant cost in Chile?

Because of its good solar resource several international companies have bid record low prices for solar thermal power plants in Chile, including the Copiapó Solar Project bid at \$63/MWh by SolarReserve in 2017. If realized this would have been the lowest ever price for a CSP project in the world.

Is there an alternative to solar energy in Chile?

Chile has begun to explore an alternative. Both Cerro Dominador and the Alba Project are powered by so-called solar salts, extracted from the Atacama Desert, composed of potassium nitrate and sodium nitrate. When melted and kept in a liquid state, they allow energy to be stored.

How much solar energy does Chile need?

Chile's DNI is 3,800 kWh/m² in the Atacama desert, the world's highest solar resource for CSP projects. The region is not subject to sandstorms. Variable renewables, PV and wind, increasingly supply the grid, and to complement these renewables, flexible dispatchable generation, such as is provided by CSP with thermal energy storage, is needed.

Does SolarReserve have a CSP project in Chile?

SolarReserve developed three large tower CSP projects in Chile between 2015 and 2018, all central tower CSP, all fully permitted (contemporaneous interview with then SolarReserve CEO Kevin Smith). Due to technical problems at Crescent Dunes storage tanks closing its Nevada project, SolarReserve was unable to move ahead with the projects in Chile.

Does Chile have a solar thermal tower?

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the pillars of the country's ambitious green energy program that began in 2019 and aims to completely replace fossil fuels by 2040.

The country benefits from consistently strong winds in mountainous region of Patagonia and some of the world's highest levels of solar radiation in the Atacama Desert. This predictable supply of wind and solar energy has led the Chilean government to estimate that 13% of the world's green hydrogen will be produced within its borders.

empresas interesados en promover el desarrollo de la energía solar en nuestro país, con el fin de representarlos, mantenerlos informados y colaborar en el posicionamiento de esta energía de la cual tenemos un tremendo potenci

Founded by a passionate team of renewable energy enthusiasts, Paragon Solar Power has been serving communities with cutting-edge solar solutions for over a decade. Our journey started with a simple belief: that the sun's energy is an abundant, sustainable resource that should be harnessed to benefit both our planet and our customers.

PARAGON SOLAR SL tiene un equipo de Entre 1 y 9 empleados y registra una facturación anual de menos de 2 millones de euros. La compañía está registrada en el Registro Mercantil de Granada, contando con un total de 6 cargos directivos. El último anuncio en Borme fue publicado el 01/03/2023, y su último depósito de cuentas anuales ...

Chile's solar and battery expansion is poised to revolutionize the country's power market. Solar will dominate the energy mix, while batteries will ensure that renewable energy can be stored and dispatched when needed, mitigating intermittency issues.
