How Do Solar Christmas Lights Work? Solar Christmas lights work the way that all solar lights do. They have a solar panel for collection of photovoltaic cells that draw in solar energy -- i.e. daylight and sunlight -- to create electricity. The cells convert the DC electrical currents via a solar inverter into usable AC electricity.

How Outdoor Solar Lights Work . Generally, solar lights need about six to eight hours of full sun exposure to work efficiently at night, but they could need more or less depending on the type and brand. "They consist of a solar panel, a rechargeable battery, and LED bulbs," says the team at Brightech, a contemporary lighting company. "During ...

We would expect a 6kW solar system in Christmas Island to produce 26.40kWhs of solar energy over the course of a year. How much this is actually worth depends on how much you pay for power and how much solar power you send to the grid. A 6kW solar power system is shown here - commonly 17 x 370W panels are used to get to 6.3kW.
