

Circor energy Faroe Islands

Who is Circor energy?

CIRCOR Energy is a market-leading, global provider of integrated flow control solutions in the expanding and evolving oil and gas industries, specializing in highly engineered valves and pipeline products and services.

Who is Circor?

CIRCOR is a world leader in the development, engineering, manufacturing, distribution, service and support of fluid handling systems. With a history dating back to 1860, CIRCOR serves a wide range of industries including oil and gas, commercial marine, defense and power generation.

What industries does Circor serve?

With a history dating back to 1860, CIRCOR serves a wide range of industries including oil and gas, commercial marine, defense and power generation. We also produce well-known global brands like Allweiler, Imo, Houttuin and Warren.

Why should oil & gas customers choose Circor?

The escalating number of environmental regulations and significant power needs in refineries. Customers turn to CIRCOR for fluid-handling solutions that transfer critical fluids without interruption and keep equipment running at peak efficiency. Because failure is not an option in oil & gas.

Why should you choose Circor for a pump & valve system?

The stakes are high, the environments are demanding, and the consequences are catastrophic for those tasked with fluid handling in the world's toughest environments. CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications.

Why should you choose Circor terminal station solutions?

Move fluids with speed and precision by having the right people and technology in place. Backed by a team of knowledgeable specialists, CIRCOR terminal station solutions ensure efficiency flows downstream, whether you're charged with loading and unloading fluids or storing, redistributing and consolidating them.

CIRCOR is a world leader in the development, engineering, manufacturing, distribution, service and support of fluid handling systems. With a history dating back to 1860, CIRCOR serves a wide range of industries including oil and gas, commercial marine, defense and power generation.

CIRCOR tackles tough challenges in four distinct oil & gas applications: exploration & production, transportation, storage, and refinery & petrochemical. Our expert team of oil industry engineers and technicians work with you to deliver the right solutions for your unique fluid handling needs.

Circor energy Faroe Islands

Save on energy costs and meet the stringent environmental regulations with solutions for the complex, energy-demanding processes in major oil refining areas around the globe: Process Charge; Residuum & Vacuum Bottoms; De-asphalting; Tank Loading; Waste & Slop Oil; Refrigeration; Storage

Pumps, valves and engineered systems from trusted CIRCOR brands support a wide range of mission critical applications in steam, combined cycle, combustion, stationary diesel, solar power, cogeneration and hydro power plants.

US-based Circor Energy is one of the leading designers and manufacturers of highly engineered products and sub-systems. The company caters to numerous industries such as oil and gas, industrial, aerospace, defense, power generation, commercial & institutional facilities, and marine industry segments.

CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications. On land and sea, in air and space, and under the ocean's surface, when failure is not an option, the most trusted name in critical fluid handling is CIRCOR.

Managing water and condensate, as well as providing lubrication to the turbine, are critical applications in Steam power plants. Plant owners and OEMs rely on pumps and engineered systems from CIRCOR to provide reliability and efficiency. Overview; Fuel Unloading / Forwarding / Transfer; Lubrication; Fuel or Burner Injection; Oil Service ...
