

Commercial battery storage systems Falkland Islands

Can I drive an electric vehicle in the Falklands?

eLink are working on transport solutions for other sectors including off-road ×4, commercial vehicles, and other specialist custom vehicles. We are able to supply EVs landed in the Falklands at an unrivalled value, no matter the brand or model. If you are interested in driving electric, get in touch.

Does the Falklands need a new wind farm?

But the Falklands feel it is not enough and besides the current wind farm is reaching its renewal date. No wonder then that notice has been given of the planning applications submitted for the Farm Expansion of Sand Bay Wind Farm to include 3 by E70 Enercon wind energy converters and battery storage. FIG and c/o Glenn figure as the applicant.

Where can I find a plan for the Falkland Islands?

FIG and c/o Glenn figure as the applicant. The plans and details can be viewed at the Planning Office, Secretariat, Stanley and on the Falkland Islands Government Planning & Building Services Facebook page. Anyone wishing to comment on these applications must do so in writing, to the Planning Officer, by 2 February 2024.

As companies integrate advanced battery chemistries and real-time energy management systems, they are responding to the shift towards renewable energy and grid modernization. Innovative business models are ...

eLink are a Falkland Islands based and owned company dedicated to delivering holistic renewable solutions including electric vehicles, charging, and renewable power. We fundamentally believe that the time to transition to a cleaner world is now.

To achieve a substantial market share in the worldwide battery energy storage market and strengthen their position, manufacturers are pursuing expansion methods such as current developments, mergers and acquisitions, product innovations, ...

The LIVOLTEK BHF-X Series is a versatile solution applicable to charging stations, factories, industrial parks, and commercial buildings. Designed for power storage, models BHF-X193/209/225 enable emergency power during outages, peak-load shifting, surplus energy trading, and virtual capacity enhancements.
