The PowerBox Pioneer is the perfect 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ultra-compact dimensions. Even so, the Pioneer still provides redundancy, as is the standard for all power supply units made by PowerBox-Systems.

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces

required for them, it offers ultra-compact dimensions.

The iGyro 3xtra ushers in the second generation of the iGyro family. The new iGyro 3xtra boasts a completely revised regulatory algorithm and set-up procedure, expanded features and enormously enhanced performance, making it the new "State of the Art".. In contrast to its predecessor - the 3e - the new iGyro no longer incorporates delta and V-tail mixers.

PowerBox-Systems GmbH has been setting standards for modern and safe power supplies in model making since the company was founded. Around 20 employees now work with passion in development, production, service and administration. We can proudly claim that many of our innovations, ideas and product developments have become an integral part of modern model ...

Sollen mehrere Sensoren am P²BUS angesteckt werden kann das PBS-Dock eine saubere Verkabelung gewährenleisten. Im PBS-Dock ist keine Elektronik eingebaut da der P²BUS ein echter Bus mit Adressierung ist. Das PBS-Dock kann daher auch als Servoverteiler für BUS-fähige Servos oder als Stromverteiler für andere Anwendungen dienen.
