

The World Bank Group works in every major area of development. We provide a wide array of financial products and technical assistance, and we help countries share and apply innovative knowledge and solutions to the challenges they face.

Supported by a \$43 million funding package from the World Bank, this ambitious initiative aims to harness the country's solar potential by developing solar power plants to create a more stable and reliable electricity supply across the islands.

Jan 27, 2022 Page 2 of 15 The World Bank Comoros Solar Energy Access Project (P177646) The project has four components : Component 1: Investment in Power Storage, Photovoltaic (PV), and System Upgrades (US\$26 million) o PV plant on Grande Comore, Anjouan and Moheli.

will finance solar PV power plants with battery storage in the three islands of the Comoros as well as system upgrades, rehabilitation, and automation to facilitate integration of solar power into the grid.

According to bank documents, the project objective is to add solar PV and energy storage facilities to the Comorian power generation mix. The project has three components; 1. Grid-connected Solar PV, Storage Facilities, and Power System Upgrades (US\$29 million). The component will deliver the

The Government of Comoros wants to improve the supply and storage of solar on its islands and is inviting applications for the development, operation and maintenance of multiple PV plants with a...

The World Bank Group has released information on the Comoros Solar Energy Access Project (CSEAP), whose four components include 9MW of solar PV and 19MWh of battery storage. It replaces an earlier project cancelled last year by the WBG.
