Who is Corre energy?

Corre Energy |7,435 followers on LinkedIn. Leader in the design,development and commercialisation of long duration energy storage |Corre Energy () is a European company(listed in Dublin,headquartered in the Netherlands) that is at the forefront of developing and operating Long Duration Energy Storage projects and products.

How will Corre's funds help the energy industry?

The funds will help Corre to bring to financial close its flagship projects in the Netherlands and Denmark and to further develop its project pipeline across Europe. The company develops, builds and operates grid-scale energy storage using hydrogen-fuelled Compressed Air Energy Storage (hydrogen storage) and green hydrogen production.

How does Corre energy support the transition to net-zero?

To read more: [Cookie Policy](#) Corre Energy is supporting the transition to net-zero by developing and commercialising Long Duration Energy Storage projects and products.

Will Corre energy deliver a'millisecond to multiday' battery project?

News: Corre Energy forms JV to deliver one of Europe's largest battery projects Today we've announced a milestone transaction to deliver a major new battery project in the Netherlands and act as the first 'millisecond to multiday' energy storage hub in our portfolio.

What is Corre energy's first CAES project?

The project is the first CAES facility to be developed, constructed and operated in Germany since the Huntorf plant in 1978. Corre Energy CEO Keith McGrane stated: "This landmark agreement combines offtake, development and co-investment arrangements to propel our first German project while showcasing the latest demand for our CAES solution.

Where is Corre energy's CAES facility located?

The CAES facility in Ahaus,situated in North Rhine-Westphalia,is strategically located between growing offshore wind power production in the north and major power consumption areas in the south. The first phase of the Ahaus project will utilise two of the site's four existing salt caverns to implement Corre Energy's multiday CAES technology.

The Green Hydrogen Hub, a collaboration between Corre Energy, Eurowind Energy and Danish state-owned Energinet, aims to establish one of the world's largest green hydrogen production plants and combine it with an underground hydrogen storage in the area between Hobro and Viborg.. The ambition is to establish a complete Power-to-X (converting ...
