

Cost of 5 kva solar system Malaysia

How much do solar panels cost in Malaysia?

The first and most significant expense when installing solar panels is the upfront cost of the system. This includes solar panels, an inverter, mounting hardware and installation fees. On average, the cost of a solar panel system in Malaysia is between RM15,000 to RM40,000 depending on the size of the system, which is measured in kilowatts (kW).

How much does a 5 kilowatt solar system cost?

In other words, a 5-kilowatt (kW) system, which is the average size for a residential solar installation, would cost around RM35,000. This cost includes the cost of the solar panels, the inverter, the mounting system and the installation labour.

Should you invest in solar panels in Malaysia?

One of the key factors to consider when investing in solar panels is the return on investment (ROI). ROI refers to the time it takes to recoup your initial investment through savings on your electricity bills. In Malaysia, depending on your energy consumption, system size, and government incentives, you can expect an ROI within 6 to 10 years.

What are the different types of solar panels in Malaysia?

Some of the common brand of solar panels in Malaysia include First Solar, Jinko, GCL, Hanwha. Another factor in the overall cost to install solar panels for your home is the inverter. For a really cost-sensitive installation you can find an unknown brand generic inverter but be careful because you'll get what you pay for.

Why are solar panels becoming popular in Malaysia?

Solar panels are becoming increasingly popular in Malaysian households as a way to reduce electricity costs and help the environment. Solar panels offer a sustainable, long-term solution for reducing electricity bills while contributing to a cleaner environment.

Are solar energy incentives a good investment in Malaysia?

Although this cost may seem daunting, many renewable energy incentives in Malaysia offer cost-saving opportunities for businesses and individuals alike, and contracts such as power purchase agreements (PPA) help companies avoid the upfront costs of buying and installing solar energy systems.

Residential Systems: For a typical home in Malaysia, a solar system can cost anywhere from RM14,000 to RM46,000. This broad range reflects the different sizes and qualities of systems available. **Commercial and Industrial Systems:** These systems are much larger and more expensive.

According to Sustainable Energy Development Authority (SEDA) Malaysia, the average cost of a solar panel system in Malaysia is around RM7.00 per watt. In other words, a 5-kilowatt (kW) system, which is the
