Lynxspring JENEsys Edge 414 Controller (50 Point Limit and 3 Devices) N4 : This EDGE 414 is a fully programmable Niagara ported controller. It consists of: 4 Digital Output (DO) relays, 6 Universal Inputs (UI) and 4 Analog Outputs (AO), N4 embedded software, N4 License that supports 50 points and 3 devices, N4 Software Maintenance for Life; included with the license, ...

Energy Control Technologies (ECT) provides the latest in control solutions to maximize a plant's production and efficiency. ECT's control systems are controlling hundreds of machines with millions of hours of operation globally.

Find out what works well at Energy Control Technologies from the people who know best. Get the inside scoop on jobs, salaries, top office locations, and CEO insights. Compare pay for popular roles and read about the team's work-life balance. Uncover why Energy Control Technologies is the best company for you.

Since setting its roots in Vermont in the 1980's, Control Technologies, Inc. (CTI) has become one of the largest independent building systems integrators in the country, offering innovative building solutions for our customers throughout the Northeast and California. You'll find our company headquarters where it all began, in Williston, Vermont.

Energy Control Technologies is a value added partner for the entire HVAC/BAS Industry. EnergyControl sells a variety of product solutions for controlling heating, ventilation and air conditioning systems. In addition to the HVAC ...

Energy Control Technologies, Inc. | 706 The most advanced control solutions on the best hardware platforms to operate your turbomachinery efficiently. | ECT (Energy Control Technologies) specializes in turbomachinery control systems, plant air control systems, and centrifuge control systems. So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

Honeywell and Energy Control Technologies (ECT) have partnered to effectively solve several control challenges using Honeywell C300 controller and ControlEdge(TM) PLC hardware and ECT TurboPAC™; Turbomachinery Process Automation Control System for turbocompressors.

Energy Control Technologies (ECT) can solve your most complex turbomachinery control problems delivering maximum production, efficiency, and machine protection on your greenfield and brownfield projects on budget and on time - every time. ECT regularly replaces legacy ...
