

How is Cuba changing its energy matrix?

As a policy decision, Cuba is changing its energy matrix by implementing four types of RES power plants and installing them along the island. This is not only a political issue, but it requires changes in the existing power system structure and new skills from people involved with the system design and operation.

What is the current electric power system in Cuba?

INTRODUCTION Current electric power system (EPS) in Cuba relies mainly on mineral oil-based fuels and natural gas fired generation. Cuba has its own oil and gas production, but e.g. on 2013, 38% of crude oil used for energy production was imported.

Does Cuba have enough hydropower?

What is more, Cuba has sufficient hydropower resources and areas with more than 300 m altitude drop, which can be used for building the necessary pumped hydro storages required for a 100% renewable energy supply system.

What are the energy reforms in Cuba?

(JICA, 2016). Cuban government has instituted a series of energy sector reforms focusing on balancing of costs, improvement of energy efficiency, reduction of risks in energy distribution, increasing international cooperation, and implementation of renewable energy technologies.

When was the last major energy crisis in Cuba?

The last major energy crisis in Cuba began at least a decade ago, according to specialists. A joint report by Torres and Piñón indicates that since 1990, electricity generation has grown very slowly, at an annual rate of just 1.1%, which is only a third of the global average.

Does Cuba need a centralized economic model?

Cuban experts, however, believe that as long as the government continues to maintain a centralized economic model, there is no real solution. Torres and Piñón have calculated that Cuba would need between \$8 and 10 billion in a decade to recapitalize the electric energy sector.

Compared to solar photovoltaic or wind energy, biogas seems to be the black sheep of renewable sources. However, experts have not stopped believing in its potential, even though the investment process for changing the energy matrix points elsewhere.

To achieve a change in the energy matrix, he said, the construction of many new parks is required, which will make it possible to replace the diesel and fuel oil generation used to cover ...

Matrix Energy is actively involved in supplying and trading petroleum products, sourcing from surplus

locations, and distributing them to meet the demands of our clients. Terminals and Storage With extensive storage capacity and terminal facilities, we provide secure and reliable storage solutions for petroleum products, ensuring their ...

The federal government has signed a \$1.5 billion prepayment deal with Standard Chartered and backed by oil traders Vitol Group and Matrix Energy. The Nigerian National Petroleum Corporation (NNPC) signed on behalf of the federal government. A report yesterday by Reuters, quoting persons close to the matter, said it would be the first such agreement

Matrix Energy is proud to be one of the participating companies in the consortium awarded the Direct Sales Direct Purchase (DSDP) contract for refined products and crude oil by the Nigerian National Petroleum Corporation (NNPC) since 2017. Additionally, we are selected as one of the off-takers of crude oil and LPG on a term contract basis.

3 ???· Matrix Energy Group is a rapidly growing indigenous and integrated Oil Marketing and Trading Company in Nigeria, which was incorporated November 25, 2004.
