CUC Building on North Sound Road (CNS): The Utility Regulation and Competition Office (OfReg) has approved an annual base rate increase of 3.2% on CUC bills, which will come into effect on power used by customers from 1 June. The hike comes as Cayman Islands residents are struggling with the rising cost of living and...

In most parts of the Cayman Islands, power is provided by a utilities company called Caribbean Utilities Company (CUC), which uses diesel generators to fuel the power grid in densely populated and developed areas on the islands, particularly in Grand Cayman. Overall, the grid is highly reliable, and CUC customers can easily report outages and ...

Carbon Zero Advanced Research (CZAR-Power) exists to ensure that every American has access to clean energy. It created an all-in-one smart energy solution to help with the deployment of clean energy sources and electric fast charging.

CZAR-Power (also known as Carbon Zero Advanced Research) is a company that develops power management systems for smart grid applications. It offers solar and battery inverters, gateways, electric vehicle (EV) fast charger products, etc.

Reducing electricity consumption can protect Cayman's environment, lower residents' costs, and help move us toward energy independence. Here are ways Cayman can take meaningful steps in that direction. Embrace Energy-Efficient Appliances and Lighting. Simple changes at home and in businesses can significantly reduce power use.

Caribbean Utilities Company, Ltd., known locally as CUC, commenced operations as the only public electric utility in Grand Cayman, the largest of the three Cayman Islands, in May 1966. The Company has been through many challenging and exciting periods but has kept pace with Grand Cayman's rapid development for over 57 years.
