What equipment does Dale supply & maintain?

At Dale, we supply and maintain an extensive range of uninterruptible power supplies (UPS), commercial and industrial generators, and energy storage systems. We're busy gearing up for one of our most anticipated events in the exhibition calendar.

What is Dale Power Solutions doing at Scarborough Science & Engineering week?

At Dale Power Solutions, we've got a long history of engaging with young people and developing programmes to help them access a career in STEM. In support of this work, we are excited to exhibit at the Scarborough Science & Engineering Week on 8th - 10th October at Scarborough Spa.

Founded in 1935 Dale Power Solutions Ltd have been providing reliable; secure power solutions for mission critical services & systems throughout the world. We are trusted by many of the UK's largest blue chip companies to design, install and maintain 100% power integrity to guarantee their operations when mains power fails. With an unrivaled ...

As a solutions business, teamwork is our bedrock. From our design and project management teams to the engineering team and customer service, all our teams work together to not only deliver the best customer experience possible but to ...

Get the most out of your diesel generator with regular servicing and maintenance. Our nationwide team of engineers use Planned Preventative Maintenance (PPM) and Predictive Maintenance, ensuring repairs are carried out at when you need them, not just when things go wrong.

## Dale power solution RÃ©union

Dale Power Solutions supplies secure power solutions to all major UK and international market sectors. We offer an extensive range of products and services, including the supply and upgrade of all types of diesel and gas-turbine generators, and UPS systems.

Diesel generators are those that are run on diesel, and can typically be divided into two basic parts: a diesel engine and an electrical generator. Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage. Natural gas generators
