Dale Power Solutions supplies secure power solutions to all major UK and international market sectors. We offer an extensive range of products and services, including the supply and upgrade of all types of diesel and gas-turbine generators, and UPS systems.

Diesel generators are those that are run on diesel, and can typically be divided into two basic parts: a diesel engine and an electrical generator. Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage. Natural gas generators
