What is the Dominican energy project?

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity grid.

Does Dominica rely on diesel?

Currently, Dominica relies heavily on diesel for about 70 per cent of its electricity. However, DOMLEC is actively engaged in renewable energy projects to reduce carbon emissions and decrease dependence on foreign oil. DOMLEC's most significant renewable energy endeavour is the construction of a geothermal power plant in the Roseau Valley.

Why is Dominica struggling with electricity?

Dominica's electricity sector is currently challenged by outdated infrastructure, largely dependent on aging diesel generators which result in high electricity expenses and an unreliable power supply, hampering the country's competitiveness.

Does Dominica support the Roseau Valley geothermal project?

Dominica's Finance Minister, Dr. Irving McIntyre, has reaffirmed the government's support for the geothermal project in Roseau Valley. The 2023/2024 fiscal year will see a continued commitment to this project, with a specific focus on the construction of the geothermal power plant and a high-capacity transmission network.

What is Dominica geothermal risk mitigation project?

The World Bank's ongoing Dominica Geothermal Risk Mitigation Project is supporting the development of the first geothermal power plant through drilling of new geothermal wells, critical for plant viability and increasing its capacity. The project will also oversee technical studies.
