Dominica sun power systems

But SunPower solar systems like the SunPower's Equinox home solar system now rely on "microinverters." A microinverter converts the power from DC to AC at the panel level, a process that is much more efficient. Whether it's a central inverter or microinverter, the electricity changes to AC electricity to power the home.

To help you understand the price of going solar in your area, we've analyzed SunPower price quotes, as well as quotes gathered by third-party sources for thousands of homeowners across the country. In Ohio, we found that the average investment to own a 5 kW solar system ranges from \$13,100 to \$14,050, or in other words from \$2.62 to \$2.81 per watt.

In light of the recent news surrounding SunPower's bankruptcy, we want to take this opportunity to address how this affects systems we installed under the SunPower name and, more importantly, clarify our commitment to you moving forward. Firstly, it's important to understand that we no longer have legal authority to work on SunPower systems or...
