

# Drilling holes on the roof for photovoltaic brackets

How to install solar panels on a roof?

All you do is select a solar panel system that can clamp on the roof. A Shingle roof provides an easy way of mounting solar panels due to the unique mounting brackets attached to the roof. However, ensure that the solar panels are rated to the particular shingles. Image Source: [yellow.co.ke](http://yellow.co.ke)

How do you install solar PV on a slate roof?

See a case study of a tiled roof here To install solar PV on a slate roof,our installers would use solar limpets. They drill through the slate into the rafter using two fixing holes,sealant is applied to the fixing holes and the base of the limpet. The solar limpet is then screwed onto the roof.

Can solar panels be mounted on a shingles roof?

A Shingle roof provides an easy way of mounting solar panelsdue to the unique mounting brackets attached to the roof. However,ensure that the solar panels are rated to the particular shingles. Image Source: [yellow.co.ke](http://yellow.co.ke) Remember,you must prepare roofing tar or silicon caulk to seal the solar panel edges to avoid leaks.

How do solar PV roof fixing systems work?

Get more information about solar PV roof fixing systems at the Ecofirst website. Solar PV tracking systems move the PV panels to track the sun, and are claimed to produce up to 30 per cent more electricity than a static array. The downside is the additional cost.

Can solar PV systems be installed on a pitched roof?

The guidelines also say that provision must be made for ventilation behind the solar PV modules to provide cooling. With the introduction of MCS012 in March 2012 we would now expect all MCS certified installers of solar PV systems to install solar PV systems on pitched roofs using only MCS012 certified roof fixings.

How do in-roof solar panels work?

In-roof solar panel mounting systems provide a very aesthetic means of installing panels,by recessing the panels such that they lie flush with the existing roof surface. They can be installed from between 12 to 50 degrees pitch and either landscape or portrait. On a new build the roof can avoid tiling the area where the solar will go.
