

Who manages the electricity sector in the Solomon Islands?

I Policy details The electricity sector is managed by the government-owned company, the Solomon Islands Electricity Authority (SIEA). SIEA is totally dependent on diesel for power generation; 80% of energy is produced for Honiara while 20% is for outstations in eight provincial centres. SIEA has a total of 14,000 customers in 2013.

Why is energy important in the Solomon Islands?

Energy is included in the Solomon Islands National Infrastructure Investment Plan and the National Development Strategy as being integral and important for achieving the goals they have set. Energy is a key driver of economic growth, social development and improvement in the livelihood of communities.

What is the Solomon Islands energy policy?

to the achievement of Solomon Islands' national vision: 'A united and vibrant Solomon Islands' (see Solomon Islands NDS 2011-2020) and the vision of the energy sector (see 2.1 below). The policy is also intended to guide the development over the next five years of energy sub-sector strategies and investment plans.

Is biomass a source of electricity in Solomon Islands?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Solomon Islands: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How many sub-sectors are there in the Solomon Islands energy sector?

2.5 Energy sub sectors The Solomon Islands energy sector is divided into six sub-sectors (thematic areas) that have been identified as important.

What are the energy security indicators for Solomon Islands?

against the energy security indicators. The 2009 energy security indicators for Solomon Islands can be used as a baseline for planning and monitoring progress if there is no other baseline information available. In addition, SINEP outputs should also be monitored according to the NDS objectives and goals.

Access to energy in Solomon Islands is a widespread issue. Supply is unreliable and cost unaffordable by most of the population. In rural areas it's a more pressing issue, it is almost non-existent. However, a recent initiative by the Stimulating Progress towards Improved Rural Electrification in Solomon Islands (SPIRES) project has set a shining example of how ...
