Zerosol Ltd. is a provider of zero carbon emission solutions for businesses and projects in Ghana and West Africa. We specialize in delivering comprehensive electric mobility and off-grid charging infrastructure solutions, along with repair services, assembly, manufacturing, renewable energy support and training on zero carbon emission solutions.

Licensing the country's electricity capacity market, particularly for Independent Power Generators (IPGs), under the Ghana Free Zones Act, presents a viable solution to enhance Ghana's competitiveness in the West African regional electricity export market.

Solar energy is transforming Ghana's future, driving sustainability and prosperity. By harnessing the sun's power, Ghana reduces its reliance on finite, polluting energy sources, combats climate change, and strengthens its energy infrastructure. Solar energy empowers individuals and communities, promoting energy independence and security ...

Specific to the power sector, GCAP Ghana aims to increase the proportion of renewable energy in the country's generation mix to 10%, as well as build technical knowledge in women to increase women's participation in energy planning and development.
