Ecostar Energy is a part of the Ecostar Holding and specializes in the development of power projects based on natural gas, hydropower, HFO, Diesel, biomass, and biofuels ranging from 1MW to 1000MW.

What is Ecostar Holding?

Ecostar Holding is a leading international EPC contractor with vast experience in the design, construction and commissioning of power generating plants in over 55 countries and 4 continents. Ecostar Holdings specializes in the development of power projects based on natural gas, hydropower, HFO, Diesel, biomass and biofuels ranging from 1MW to 1000MW.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

What is Ecostar Energy's financial position like?

Ecostar Energy, as part of the Ecostar Holding, enjoys a strong financial position. In the last few years, the company has been engaged in projects as an independent power producer (IPP), Build-Own-Transfer (BOT), or Build-Own-Operate (BOO).

What to do in Cayman if there is no sun?

Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery. These rechargeable lithium-ion batteries are wall mounted and can be stored either outside your home or inside your garage.

The article called upon a 30-day consultation period to gather feedback from the Cayman Islands community on its updated National Energy Policy. First approved in 2017, the NEP undergoes a mandatory review every five years to monitor and report on progress and evaluate targets and implementation plans based on new and emerging technologies.
