

What is Solarstone doing in Estonia?

Solarstone is reinforcing Estonia's commitment to sustainable energy solutions by opening Europe's largest solar roof factory to produce 14 times as many building-integrated solar roofs as Tesla in the U.S. The factory can assemble 13,000 integrated solar panels per month.

Can solar panels be installed on a flat roof in Estonia?

In Estonia, most solar panel installations are installed on pitched roofs. Ideally, the panels should be installed at a 41 degree angle on the south side of the building. If they are installed to the north, the panels will not generate electricity. Alternatively, flat roofs may also be installed with solar panels.

Why should you choose a solar panel system in Estonia?

A solar panel system will save you money on energy, and can also be used as a backup power source during power outages. The Estonian climate is favorable for solar energy production. The country experiences approximately 1600 hours of sunshine a year and the climate is relatively cool.

Solar panels on the roofs can be aesthetic to look at for the naked eye - three guys, the founders of Estonian CleanTech startup Solarstone, figured out how this can be done.

The episode of the long-running Channel 4 show "Grand Designs," which follows the construction of a single house from breaking ground to completion, aired last November. Solar panels made by Estonian firm Roofit.Solar appeared in the episode, and the company says it has been riding that wave ever since.

In Estonia, most solar panel installations are installed on pitched roofs. Ideally, the panels should be installed at a 41 degree angle on the south side of the building. If they are installed to the north, the panels will not generate electricity.

Metsolar produces unlimited variety of tailored BIPV solar panels for Estonia and other regions of EU, that are efficient, cost competitive and have exclusive design possibilities.
