Who is Brenmiller Energy?

Brenmiller Energy provides sustainable thermal energy storage solutions. The company was founded by Avi Brenmiller, former CEO of Siemens CSP and Solel, and a team of experts in the field of renewable energy. Since 2012 the company has developed a patented thermal energy storage technology based on storing heat using crushed volcanic rocks.

Is Brenmiller Energy the first Gigafactory in the world?

Image: Business Wire. Israel-based thermal energy storage firm Brenmiller Energy has inaugurated a factory targeting 4GWh of annual production capacity by the end of 2023, the first such gigafactory anywhere, it claimed.

Will Brenmiller be able to produce 4gwh of BGen modules?

Its production lines are expected to reach full capacity by the end of the year and will be able to produce 4GWh of Brenmiller's bGen modules annually. Israel-based Brenmiller Energy has inaugurated what it claimed is the first thermal energy storage gigafactory anywhere in the world.

Where is Brenmiller based?

The company announced the opening of its thermal energy storage gigafactory in Dimona, Israel, yesterday (2 May), saying it will be its primary manufacturing hub. Its production lines are expected to reach full capacity by the end of the year and will be able to produce 4GWh of Brenmiller's bGen modules annually.

What is Brenmiller TES technology?

Brenmiller's award-winning TES technology is a heat battery using crushed rocks to store high-temperature heat. Powered by renewable energy and generates carbon-free heat, steam or hot air, ensuring stable conditions for 24/7 operation. Electrification of heat for zero-carbon steam:
