

What is Egypt energy?

Join Egypt Energy, a 30-year legacy event celebrating Egypt's thriving energy sector. Explore a diverse range of energy products & connect with energy leaders.

What type of electricity is used in Egypt?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Egypt: How much of the country's electricity comes from nuclear power?

Will EGP 2 trillion be needed in Egypt's energy sector?

The International Finance Corporation (IFC) believes that EGP 2 Trillion are required to be brought into Egypt's energy sector in climate-smart investments by 2030. Egypt is expected to overtake South Africa in the next decade to become the largest electricity market in Africa.

How much wind power does Egypt have?

Egypt's wind-generated power capacity is expected to reach 7 GW by 2022, making it an important contributor to the renewables energy mix. According to EY, Egypt currently has about 500 MW of wind-power plants in operation, plus three privately owned independent power producers (IPPs) with a generation capacity of 2.5 GW.

Does Egypt have solar power?

The sun shines 9-11 hours a day from north to south, with few cloudy days. The World Bank highlights that Egypt has excellent solar resources with electricity-generating potential estimated at 73,656 terawatt-hours (TWh). According to the US International Trade Administration, the first solar thermal power plant was built in 2011 in Kuraymat.

Will Egypt reach 42% of its electricity mix by 2030?

Our Standards: The Thomson Reuters Trust Principles. Egypt is still aiming for renewable energy to reach 42% of its electricity generation mix by 2030, but that goal will be at risk without more international support. Prime Minister Mostafa Madbouly told the COP29 conference on Tuesday.
