Do you need electrical distribution board (DB) box services in Singapore?

WhatsApp Us For Enquiry! There are two main reasons you may need electrical distribution board (DB) box services from a certified electrician in Singapore like Daylight Electrician. Firstly, you could be installing a new electrical DB box for your newly renovated home or office.

What is an electrical distribution board?

An electrical distribution board is a component that safely distributes electricity from a larger circuit into multiple smaller circuits. In a typical residential property, a distribution box connects the property to the electrical supply of the building and distributes the electricity to smaller electrical circuits.

What are the parts of electrical DB box in Singapore?

The main parts of your electrical DB box in Singapore are as follows: 1. Miniature circuit breakers (MCB)- These serve to protect the CU from sending excessive heat to the electrical system and appliances in your apartment. If there is a power surge, the MCB will trip off the power supply to your home circuit and protect it from damage.
