

Electricity backup for home Bahamas

Who is Bahamas solar?

At Bahamas Solar we take care of your project from start to finish. Offering full turnkey systems for all residential and commercial operations. Serving all The Bahamas, from Nassau to the out islands. We offer customized solutions tailored to your specific needs. The first step to going solar is a site assessment.

How does the Bahamas produce electricity?

In the Bahamas, electricity production can either feed into the larger grid or power a single facility or neighborhood. Traditionally, electricity has been produced through diesel-fueled generating stations on each inhabited island, with power distributed to everyone via overhead lines.

Is the Bahamas self-sufficient in electricity?

The Bahamas is self-sufficient in generating electricity, which is supplied by fossil fuel. The company has also announced plans to build a US\$15 million fiber-optic system to create a high-speed communication system between the Bahamas and the United States.

This load form is the first step to energy independence and becoming aware of your power needs. Our design will only be as accurate as your load form is, so remember to include all your appliances, air conditioning, lighting, water ...
