

Can Congo's mineral resources provide a pathway to peace?

Can the Democratic Republic of the Congo's mineral resources provide a pathway to peace? Minerals like lithium and cobalt are key components in the batteries that could support the world's transition away from fossil fuels. The Democratic Republic of Congo (DRC), Africa's second-biggest country by land mass, is rich in both those elements.

How can I buy conflict-free electronics in Congo?

To buy conflict-free electronics in Congo, contact major electronics companies and ask them to sell conflict-free products. Visit to email them and express your interest. The message is clear: "If you take conflict out of your cell phone, I will buy it." Stay in touch!

How do people work in the DRC?

"People are working in subhuman, grinding, degrading conditions. They use pickaxes, shovels, stretches of rebarto hack and scrounge at the earth in trenches and pits and tunnels to gather cobalt and feed it up the formal supply chain." Kara says the mining industry has ravaged the landscape of the DRC.

Why did Belgium return a single tooth to the Congo?

Belgium returned a single tooth to the Congo this week. Here's why The first democratically elected president of the Congo [in 1960], Patrice Lumumba, made a pledge that the country's immense mineral riches and resources would be used for the benefit of the people who live there.

How much would a DRC plant cost?

This is three times cheaper than what a similar plant in the U.S. would cost. A similar plant in China and Poland would cost an estimated \$112 million and \$65 million, respectively. Precursor material produced at plants in the DRC could be cost competitive with material produced in China and Poland but with a lower environmental footprint.

Why should smugglers be held accountable for smuggling minerals in Congo?

Smugglers should be held accountable for smuggling minerals from Congo because the countries need to ensure that the minerals have verifiable documentation accompanying them, documenting the chain of custody to ensure that they are conflict free and have been legally taxed by the Congolese authorities. This is important to prevent the illegal mining and trade of minerals in the region.
