Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

The Pitcairn Islands are situated lat. 25Deg. 04 minS Lon. 30deg. 05"W (for you boatie buffs). They are about 4,800 Km. from New Zealand lying towards South America. The first inhabitants to settle the Islands were Polynesians of unknown origin. Someone reckoned from Mangareva some 490 km to the NW.

solomon islands; vanuatu; territory. new caledonia; micronesia. independent. micronesia; kiribati; marshall islands; nauru; palau; territories. guam; northern mariana islands; wake island; ...

The current Pitcairn Island dependency ratio (those under 18 and over 65 compared to the productive population) stands at 58 percent. The issue for Pitcairn Islands is that the ratio is trending in the wrong direction and by 2025 it will be over 100 percent. At this point there will be more pensioners than productive-age persons.

The mutineers turning Bligh and some of the officers and crew adrift from HMS Bounty on 29 April 1789. Adamstown, the only settlement on the Islands. In 1790, nine of the mutineers from the British naval vessel HMS Bounty, along with the native Tahitian men and women who were with them (six men, 11 women, and a baby girl), settled on Pitcairn Island and set fire to the Bounty.

Fiji these two islands account for over 90% of energy consumed by the islands covered in this study. Photo 2. The composition of overall primary energy consumption on the islands. Fiji and Papua New Guinea consume over 90% of the energy produced by ...
