What is Tata Power doing in Bhutan?

Tata Power has joined forces with Druk Green Power Corp. to develop 5,000 MW of clean energy capacity in Bhutan. This includes large-scale hydropower and solar projects aimed at supporting Bhutan's energy goals and regional integration.

Is Bhutan Power Corporation a public company?

Through 2011, the Bhutan Power Corporation remained a publicly held corporation, comprising about 9 percent of the nation's civil service, though its long-term goals included privatization. In December, 2009, Bhutan Power Corporation had 91,770 customers across the country, out of which 47,846 were rural domestic users.

What is the main energy source in Bhutan?

On-grid hydropower is the country's main energy source. Bhutan operates four major hydroelectric facilities, several small and mini hydroelectric generators, and has a handful of further sites in development. Many of the small and mini hydropower plants in Bhutan serve remote villages that remain disconnected from the power grid.

How many solar power systems are there in Bhutan?

As of 2015 there are approximately 4,600 solar power systems operating in Bhutan, with 2,750 on-grid systems and 1,848 off-grid systems. The development potential is estimated at around 12,000 megawatts. Solar energy in Bhutan has received direct investment from domestic and international sources.

How much power does Bhutan have?

Bhutan's installed power generation capacity is approximately 1.6 gigawatts (GW). Over 99 percent of the country's installed capacity comes from hydropower plants, accounting for 1,614 megawatts (MW) of the country's total capacity of 1,623 MW in 2018. More than 99.97 percent of households have access to electricity.

Does Bhutan have hydropower?

Bhutan revels in achieving 2,450 MW of hydropower generation capacity and about 3 MW solar and wind energy. This diverse energy mix supports a greener future while preserving Bhutan's natural splendour. Reached electricity to every home with 99.9% grid connectivity Hydropower dreams: Can Bhutan tap its full potential?
