

Energy depot Monaco

Who owns the electricity in Monaco?

Monaco's sole national power company is Sociéte Monégasque de l'Electricité et du Gaz (SMEG, Monegasque Electricity and Gas Company), which operates the country's electric and gas grid and provides related services. SMEG is 60% owned by Engie, 20% by the State of Monaco, 15% by EDF, and the rest by private investors.

What is Monaco Energy Renouvelables?

To support Monaco's transition, the Prince's Government and Sociéte Monégasque de l'Electricité et du Gaz (SMEG) pooled their skills in 2017 to create Monaco Energies Renouvelables (M.E.R.), with the aim of giving Monaco 100% green electricity production capacity equivalent to the territory's consumption.

How much electricity does Monaco use?

In 2018, the country used around 536,000 MWh of electricity, of which a majority of it was used tertiary services. The first and later sole electric plant was a gas-fired power plant built by the casino operator SBM at base of Fort Antoine in Monaco-Ville.

Who is Energy depot?

Energy Depot develops and manufactures energy storage systems in Konstanz on Lake Constance. Our supplier structure is also regional. We are... Energy Depot is dedicated to the development and production of energy storage and energy management systems.

Is biomass a source of electricity in Monaco?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Monaco: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Monaco use fossil fuels?

Monaco has no domestic sources of fossil fuels and relies entirely on imports of electricity, gas and fuels from France. Monaco's sole national power company is Sociéte Monégasque de l'Electricité et du Gaz (SMEG, Monegasque Electricity and Gas Company), which operates the country's electric and gas grid and provides related services.

To achieve this target and set the Principality on a course to carbon neutrality by 2050, the national action plan focuses primarily on the three sectors responsible for the highest greenhouse gas emissions: road transport, waste treatment and energy consumption in buildings.

Monaco: Many of us want an overview of how much energy our country consumes, where it comes from, and

if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
