The Department of Energy is tasked with promotion and implementation of renewable energy projects and programs. A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS).

Does Lesotho need electricity?

The country is renowned for an abundant supply of unspoilt and unexploited water resources, capturing approximately 50% of Southern Africa's total catchment run-off, therefore, hydropower contributes to most of its electricity needs. When it comes to energy access, Lesotho is considered one of the lowest in Africa.

What is renewable Lesotho?

Renewable Lesotho brings together a toolbox of instruments, including: Infrastructure development: supporting a pipeline of projects ranging from off-grid solutions, mini-grids, solar home systems, to potential larger investments in hydro-, solar, including floating solar, wind energy, and transmission.

Can Lesotho become an energy exporter?

Energy independence /Lesotho can meet its own energy needs and potentially become an exporter of clean energy, setting an example for the entire region, and reducing its current energy import bill.

Who regulates the electricity sector in Lesotho?

From August, 2004 until April, 2013 the Authority was mandated with regulating the electricity sector. In 2007 the Government decided that the Lesotho Electricity Authority (LEA) should be transformed to be a multi-sector regulatory body assuming additional powers to regulate urban water and sewerage services in the country.
