

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

Is Mali ready to scale up renewables?

The Ministry, working through the Mali Renewable Energy Agency (AER-Mali), has initiated a partnership with the International Renewable Energy Agency (IRENA) to assess Mali's readiness to scale up renewables.

What is the energy supply in Mali?

As in most sub-Saharan African countries, biomass (mainly in the form of firewood) provides the bulk of the energy supply (Figure 4). Mali has neither proven hydrocarbon resources nor a refinery; as a result, all petroleum products are imported through neighbouring coastal countries which impacts on the country's balance of payments.

What is Mali's national energy policy?

3.2. Energy policy and regulatory frameworks Mali's National Energy Policy (NEP) dates back to 2006 and aims to contribute to its overall sustainable development through the provision of cheap and reliable energy services, in order to increase electricity access and to promote its underlying socio-economic benefits.

What is the electricity system in Mali?

Mali's electricity system encompasses a national grid that is owned and operated by Energie du Mali SA (EDM SA) which supplies 35 towns, including Bamako. In addition to the national grid, EDM SA manages 30 isolated centres equipped with diesel generators and two centres supplied by Côte d'Ivoire.

What are the different types of energy transformation in Mali?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Mali for 2022. Another important form of transformation is the generation of electricity.
