

What is EnergyLab Nordhavn?

EnergyLab Nordhavn is a project located in Copenhagen's Nordhavn, committed to the development of smart solutions for the future sustainable and cost efficient integrated energy system. From 2015 until 2019, EnergyLab Nordhavn - New Urban Energy Infrastructures developed and demonstrated future energy solutions.

Is Copenhagen's Nordhavn a Smart City Energy Lab?

Copenhagen's Nordhavn is a full-scale smart city energy lab where electricity and heating, energy-efficient buildings, and electric transport have been integrated into an intelligent, flexible, and optimized energy system.

Who is Energy Laboratories?

Energy Laboratories, Inc., the leader in chemical and environmental analysis for companies throughout North America. Our depth of knowledge and years of experience means we can meet the full spectrum of analytical testing needs for water, waste, soil, air and petroleum products. Need to make an order?

What is energydatadk?

EnergyDataDK is a meeting point for extraction and management of energy data from several national laboratories and data platforms. Our large collaboration area ensures flexible and scalable test environments for the development of new digital solutions in the energy field.

What is powerlabdk?

PowerLabDK is a world-class experimental platform for technology development, testing and demonstration of sustainable power and energy solutions. PowerLabDK conducts research and innovation in future energy systems at all scales from components to system level.

What is Doll - Danish outdoor lighting lab?

DOLL, Danish Outdoor Lighting Lab, is a permanent platform that brings together players in outdoor lighting and Smart City solutions to create new innovative solutions. DOLL's mission is to enable decision makers in the public and private sectors to choose the most optimal, innovative lighting solutions.

Waste. At Energy Laboratories, we want your waste--literally--so that you can get on with your business. Whether you need to analyze the soil at a reclamation site or the solids from effluent, we utilize the latest methods and possess the proper certifications including the Safe Water Drinking Act, Clean Water Act and Leaking Underground Storage Tank Program.

Nordhavn - sustainable energy and transport o Over the next 50 years, Nordhavn will develop into a new district with 40,000 residents and 40,000 jobs. o The ambition is to become an example ...

Das Projekt „EnergyLab Nordhavn“ wird die Energielösungen der Zukunft entwickeln und vorstellen. Hier wird gezeigt, wie Strom und Wärme, energieeffiziente Gebäude und die Elektromobilität in ein intelligentes, flexibles und optimiertes Energiekonzept integriert werden können, das zu einem großen Teil auf erneuerbaren Energien beruht.
