EnerSys®, the global leader in stored energy solutions for communications applications, has introduced the PowerSafe® iON 36-1800, a new Lithium-ion battery that when coupled with an Alpha® XM3.1-HP Broadband UPS and enclosure provides Cable Broadband operators extended run time systems to maintain network operations for up to 72 hours after ...

PowerSafe SBS XC+ is designed for renewable energy applications where the battery must undergo repeated cycling with daily depths of discharge of up to 35% of capacity C 120, such as rural settlements, communications systems and lighting systems. The battery is normally used with a daily cycle - charge during the day and discharge during night.

the PowerSafe® SBS XL battery that enable long life at high temperatures. The PowerSafe® SBS XL battery range has an extended design life of 10 years at 95°F (35°C) for float applications. EnerSys has met this need through continual development of the TPPL technology and customer collaboration over nearly 50 years. TPPL Background

The PowerSafe Ni-Cd battery range includes the RL, RM, RH, VGL and VGM series. All of them feature a robust design with excellent resistance to electrical and mechanical stress, and low risk of terminal degradation. Additionally, their electrolyte reserve extends maintenance intervals, and their translucent plastic

from EnerSys&#174;. The PowerSafe SBS XL series comes from a respected lineage, the industry leading, PowerSafe SBS Thin Plate Pure Lead (TPPL) battery. PowerSafe SBS XL takes the SBS to the next level. The PowerSafe SBS XL battery is designed to provide 10 years of life at 95&#176;F (35&#176;C) in back up applications at high operating temperatures.

PowerSafe V-FT batteries have long been recognised worldwide as a premium solution. Thanks to proprietary TPPL technology, PowerSafe V-FT batteries deliver superior performance while occupying less space than conventional standby power batteries. A range of compact, energy-dense designs are available for 19" and 23" racking. Request a Quote
