

Equatorial Guinea farm house with solar panels

Aptech Africa pioneers sustainable development by installing 11 solar systems in remote Equatorial Guinea villages, enhancing education, healthcare, and community empowerment through reliable, clean energy sources.

In collaboration with the project developer and partners, Princeton Power Systems began the build-out of a 5-MW self-sufficient solar microgrid on Annobon Island, consisting of 20,000 solar panels split into three ...

The government of Equatorial Guinea has selected MAECI Solar, together with GE Power and Water systems and Princeton Power Systems, to design Africa's largest self-sufficient solar microgrid, handling 100% of the island's energy demand.

The government of Equatorial Guinea has selected MAECI Solar, together with GE Power and Water systems and Princeton Power Systems, to design Africa's largest self-sufficient solar microgrid, handling 100% of the ...

In a groundbreaking initiative, Aptech Africa has embarked on a mission to bring sustainable energy solutions to remote communities in Equatorial Guinea. Through the installation of 11 solar systems, Aptech Africa is lighting up lives, fostering development, and paving the way for a brighter future.

Aptech Africa installed 11 solar systems in 11 different villages of 5kWp, 15kWp, and 20kWp with battery energy storage of 12kWh, 15kWh, and 36kWh respectively. One of the systems is a hybrid system and the rest are ...

Wise Power Systems has installed one of the world's largest 100% solar micro grids on Annobon Island, Equatorial Guinea. The systems is made up of 20,000 solar panels capable of producing up to 5 Megawatts of power, and the ...

The Government of Equatorial Guinea, through the Ministry of Mines, Industry and Energy, is conducting in Annobon the Project of Solar Energy as a Renewable Energy Source, which will allow island residents to enjoy clean energy. A group of national technicians is being trained to manage the plan.

Aptech Africa installed 11 solar systems in 11 different villages of 5kWp, 15kWp, and 20kWp with battery energy storage of 12kWh, 15kWh, and 36kWh respectively. One of the systems is a hybrid system and the rest are standalone systems working alongside a generator and existing grid.

In collaboration with the project developer and partners, Princeton Power Systems began the build-out of a

Equatorial Guinea farm house with solar panels

5-MW self-sufficient solar microgrid on Annobon Island, consisting of 20,000 solar panels split into three geographically-separated arrays, three large-scale advanced battery banks, and redundant generators.

Despite logistics challenges, Aptech Africa has installed 11 solar systems in Equatorial Guinea featuring capacities of 5kWp, 15kWp, and 20kWp, coupled with battery energy storage ranging from 12kWh to 36kWh. Among these, one system is hybrid, while the rest are standalone systems coexisting with generators and the existing grid.

In a groundbreaking initiative, Aptech Africa is leading a mission to bring sustainable energy solutions to the isolated communities of Equatorial Guinea. By deploying 11 advanced solar systems, Aptech Africa is not only illuminating lives but also fostering development and paving the way for a brighter future.
