

Equatorial Guinea solar green capital

Despite logistics challenges, Aptech Africa has installed 11 solar systems in Equatorial Guinea featuring capacities of 5kWp, 15kWp, and 20kWp, coupled with battery energy storage ranging from 12kWh to 36kWh. Among these, one system is hybrid, while the rest are standalone systems coexisting with generators and the existing grid.

US-based renewable energy firm Altus Power has agreed to purchase True Green Capital Management's (TGC) 220MW solar asset portfolio for a consideration of \$293m. The portfolio consists of 207MW of commercial-scale operating solar capacity and 13MW of capacity nearing completion.

Aptech Africa installed solar systems in 11 villages with capacities of 5kWp, 15kWp, and 20kWp and battery storage from 12kWh to 36kWh. These systems used Ulica solar modules, Growatt inverters, and Ritar lead-acid batteries and ...

Equatorial Guinea is planning a new capital in Oyala, in the middle of the tropical rainforest. Within the next decade the government and the president's residence will move to the jungle capital, together with a total of 200,000 other people. The central African country plans to finance this futuristic city with its oil reserves, estimated at almost 2 billion barrels.
