Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Why is hydroelectric power important in Eswatini?

Projects such as these conserve millions of liters of fuel throughout their lifetime and ensure year-round reliable and sustainable electrification for public facilities. Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini.

Can a wind turbine be installed in Eswatini?

While wind energy production in Eswatini is negligible, the country's mountainous regions hold immense potential for installing wind turbines. Government feasibility studies in the Lubombo Plateau, a largely uninhabited and undeveloped region near the border with Mozambique, are ongoing.

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

By investing in renewable energy and expanding electric connectivity, the government aims to liberate unelectrified Swazi citizens from the energy poverty trap, enabling them to realize their untapped potential. These are the four key sectors of renewable energy in Eswatini that are receiving strategic government investments and support.

Prince Lonkokhela, the minister of Natural Resources and Energy, announced at the event that Eswatini is set to increase its electricity generation capacity by 241 megawatts as of July 2026 in an ambitious goal for ...

This policy brief examines the complex interplay of factors shaping Eswatini's energy landscape, from security to coal development's environmental, economic, and social implications. It outlines a roadmap for a Just Energy Transition in the Kingdom.

Prince Lonkokhela, the minister of Natural Resources and Energy, announced at the event that Eswatini is set to increase its electricity generation capacity by 241 megawatts as of July 2026 in an ambitious goal for universal, affordable, reliable and modern energy by 2030. As highlighted during the forum, this presents excellent opportunities ...

2 ???&#0183; According to the Kingdom of Eswatini Energy Masterplan 2034, sugar companies are interested in increasing their capacity from the current 106MW to 160MW, while timber firms ...

6 ???&#0183; As the globe shifts to cleaner energy, Eswatini faces economic losses if it does not invest in renewables. This is according to the policy brief that was released by the United ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

6 ???&#0183; As the globe shifts to cleaner energy, Eswatini faces economic losses if it does not invest in renewables. This is according to the policy brief that was released by the United Nations Development Programme (UNDP) Eswatini, examining the complex interplay of factors shaping the Southern African kingdom's energy landscape, from security to ...

o To strive to provide all households with access to modern energy by 2030. o To develop 40 MW Solar PV and 40 MW Biomass project by 2024 o To ensure energy security by 2026 (baseload generation capacity) o To provide adequate supply of energy to drive the economic recovery

2 ???&#0183; According to the Kingdom of Eswatini Energy Masterplan 2034, sugar companies are interested in increasing their capacity from the current 106MW to 160MW, while timber firms have indicated investment plans to generate 37MW. ... and cost-effective battery technologies that have been crucial for the widespread adoption of energy storage and ...

Electricity Act of 2007, Energy Regulatory Act of 2007, and Electricity Company Act of 2007 - including licensing guidelines, are currently undergoing a review to consider industry developments, especially in the renewable energy space. Eswatini imports approximately 70% to 80% of its electricity from ESKOM,
