Does Morocco's green energy system contribute to high-quality job creation?

The production of and transition to renewable energy through Morocco's green energy system is emerging as a key contributor to high-quality job creation. The expansion of the green industrial manufacturing and sustainable solutions sectors is at the threshold of becoming a driver for more expansive high-quality job creation.

Is green industrial manufacturing a viable option in Morocco?

Green industrial manufacturing driven by renewable energy has significant potential to hire individuals with low levels of education in urban areas, provided they are able to acquire technical vocational training through an appropriate expansion of Morocco's training ecosystem in coordination with the needs of the country's green energy ecosystem.
