

The UK gigafactory intends to maximise a renewable energy mix, with an ambition for 100% clean power. The facility will employ innovative technologies and resource efficient processes to reuse, recycle and recover ...

Once the proposed factory comes up in Gujarat, it will become the leading state of lithium ion cell manufacturing in the country. Vijay Nehra, CEO of Tata Group subsidiary Agartas Energy Storage Solutions and secretary, science and technology, Government of Gujarat inked the agreement.

We will design, develop and manufacture high-quality, high-performance, sustainable battery solutions for multiple applications to match our customers' requirements. Derived from the Sanskrit word "Agra", the world's oldest language, our ...

Last month, the Gujarat government announced the allocation of 22.50 lakh sq m of land in Sanand to Agratas Energy Storage Solutions for the establishment of the battery factory. In its first phase, Agratas aims for a ...

The collaboration with Tata Technologies will enable Agratas to accelerate product development, including the design and integration of battery cells into modules and packs for global customers in the mobility and energy ...

Our world-class gigafactories are designed to be powered by clean sources of electricity, including purpose-built renewable energy plants. We are embedding circular economy processes throughout our value chain to reuse, recycle and recover materials back into production.

Last month, the Gujarat government announced the allocation of 22.50 lakh sq m of land in Sanand to Agratas Energy Storage Solutions for the establishment of the battery factory. In its first phase, Agratas aims for a production capacity of 20 GWh.

The automaker told investors on June 12 that its future EVs will offer a driving range of up to 450 miles thanks to battery cells sourced from Indian company Agratas Energy Storage...

The two companies are maximising Tata Group's comprehensive #OneTata approach, with Tata Technologies also developing the digital business architectures to support the production of best-in-class battery solutions at Agratas' gigafactories in India and the UK.

IPS is working in innovative compressed air storage solutions, in cooperation with CTG, for storage of energy in the ground, as well as traditional options like large scale pump power storage and small scale smart hybrid
