

Fdf energy Mali

Is energy du Mali subsidized?

Energie du Mali (EDM), the state-owned electric utility, is poorly managed and heavily subsidized by the government and regional multinational banks, as the relatively high price of its electricity (average \$0.17/kWh) is insufficient to cover the cost of production and distribution (\$0.24/kWh).

How is energy used in Mali?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What are the main sources of electricity in Mali?

At present, thermal and large-scale hydropower plants are the main sources of electricity supply on the national grid. Renewable energy could provide the most competitive form of power in Mali due to today's advanced technological reliability, declining technology costs and high resource potential.

Is Mali ready to scale up renewables?

The Ministry, working through the Mali Renewable Energy Agency (AER-Mali), has initiated a partnership with the International Renewable Energy Agency (IRENA) to assess Mali's readiness to scale up renewables.

Is Mali ready for a green-energy future?

Mali is ripe for the steady transition from its fossil fuels-laden past to a cleaner green-energy future for its socio-economic growth according to its investment plan. Like most West African countries, Mali relies heavily on fossil fuels but has significant potential in solar and wind energy.

Is biomass a good energy source in Mali?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Mali: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

Mali Total Energy Consumption. Energy consumption per capita is low, at about 0.3 toe/capita in 2022, compared to the average for Sub-Saharan Africa (0.6 toe/capita), including 130 kWh of electricity (2022). Since 2012, primary energy consumption has increased by an average of 5%/year, reaching 7.5 Mtoe in 2022. The share of biomass in primary ...
