Does Fiji have solar power?

According to the annual reports of Energy Fiji Limited (EFL), there has been some solar electricity generated from 1998 to 2007 by a solar PV system that was commissioned in November 1997 (FEA 2016). In 1998, this system generated around 12 MWh of electricity and was doing well for almost 6 years.

Where can land based solar installations be done in Fiji?

Hence, considering the large land area in Viti Levu and Vanua Levu, land based solar installations can be done near locations with demand depending on the solar resource and land availability for installations. Photovoltaic power potential in Fiji. (Source: WBG 2016)

Does Fiji have good solar insolation?

Fiji has good solar insolation. Using 1983-2005 NASA data (NASA 2017), average annual insolation on a horizontal surface in Fiji is 5.4 kWh/m²/day with a standard deviation of 0.6 kWh/m²/day (see Fig. 8.1).

Solar Fiji is proud to partner with the Australia Infrastructure Financing Facility for the Pacific (AIFFP) to deliver affordable and sustainable solar energy solutions across Fiji. This ...

Fiji is embarking on a project to bring solar power to its remote islands. It starts by creating tenders for mini-grid construction, and employing tools to customize energy systems for each community ensuring each community's needs are met.
