

# Fixed card slot for photovoltaic panel packaging

What is solar panel packaging?

A typical solar panel packaging consists of a cardboard box with the footprint of a pallet and houses between 26 to 36 panels in the box. A good solar panel packaging design makes it easier to transport solar panels on a pallet, and provide excellent protection to the panels during transport.

What makes a good solar panel packaging design?

A good solar panel packaging design makes it easier to transport solar panels on a pallet, and provide excellent protection to the panels during transport. WINAICO's solar boxes are so tough that one can withstand the weight of a ton, roughly the weight of a pallet full of solar panels, for an hour.

How much does a first solar FS-Series box weigh?

This document provides information about the recommended handling of the standard box used to store and ship First Solar FS-Series Modules. Each First Solar packing box is filled with 50 modules, along with internal support material. For planning purposes, a fully loaded box weighs up to a maximum of 665 kg (1466) for a 50-module pack.

Do solar panels need packaging?

There are PV manufacturers that reduce their costs to a minimum when it comes to the packaging. There are known cases of pallets of solar panels that were simply covered in plastic. There are better and safer ways to transport your panels. For more details read our feature article on solar panel packaging.

How much does a full solar module pallet weigh?

As part of our internal design criteria, we would stack a full solar module pallet, which weighs more than 700 kg, on top of an empty box. A qualified packaging design would maintain perfect form for 5 minutes to confirm the empty box does not crumple under the weight of a full pallet.

How are first solar modules packaged?

Modules will be packaged in First Solar's 50-pack module boxes. All modules within a box will be a single Model Number. First Solar will use commercially reasonable efforts to ship full containers or full truck loads only. NOTE: All dimensions in centimeters [inches]. Dimensions should be used for general guidance only.
