

# Flexible solar panels marine Colombia

The SunPower Flexible Solar Panel is the perfect combination of power and portability. Designed for life at sea, featuring second-generation back contact cells and top-grade polymer materials, this panel can flex up to 30 degrees for easy installation, while still providing maximum power output and charge capacity.

Marina solar perfecto para el mantenimiento de los sistemas esenciales de la batería en las naves de mar profundo del mar, o simplemente cargar el motor de arrastre de la embarcación pesquera, los paneles solares marinos son el panel definitivo para toda embarcación.

Our flexible solar panels, extended through integrated high-efficiency MPPT charge regulators. Simply connect directly to the battery, can be combined with other ALLinONE panels in parallel.

Go Power Solar Flex solar panels are designed to provide a powerful charging solution for boat batteries. Unlike other "thin" products, Solar Flex panels use high-efficiency monocrystalline cells that produce more power per square foot than any other flat panel on the market.

The latest flexible marine solar panels from Solbian, unmatched durability on flexible surfaces. Monocrystalline high efficiency SR cells are sandwiched between two patented metallic grids providing optimum efficiency and strong mechanical support.

Weighing only 3.5 lbs per 100 watts, our panels are 1.3mm thin, extremely flexible, and easy to install making them perfect for any marine vessel. Better Powered by next-gen energy capture technology, our panels deliver 24% efficiency, with built-in bypass diodes to maintain performance even in shaded conditions.
