With the decreasing cost and improving performance of small hydro installations, solar power, wind power, and energy storage systems, renewable energy is expected to supplement or replace existing diesel grids on islands and in remote areas.

As many address the concerns of energy insecurity in Greenland, it is clear that the future of Greenland's energy is shifting towards renewables. By harnessing the resources and power of the Arctic, the goal of the government-owned energy company, Nukissiorfiit, is to produce 100% green energy products throughout Greenland by the year 2030 ...
