

Georgia storage power station

The Georgia Public Service Commission (PSC) has signed off on Georgia Power's plans to build 500 megawatts (MW) of battery energy storage across four locations, voting unanimously to certify the utility's Application for Certification on Tuesday.

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour period, adding resiliency to the state's power grid and helping ensure reliable energy for a ...

Georgia Power will install 265 MW at McGrau Ford substation in Cherokee County, with 560 MW still available and being determined for deployment. That puts Georgia Power on track to own and operate a total of ...

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC) on Thursday to mark commercial operation of the company's first "grid-connected" battery energy storage system (BESS).

Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's 2023 Integrated Resource Plan (IRP) Update.

Earlier this month, Georgia Power Company submitted its 2023 Integrated Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW. Georgia Power included attachments with information and data on each of the proposed ...

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour period, adding resiliency to the state's power grid and helping ensure reliable energy for a growing Georgia.

Georgia Power will install 265 MW at McGrau Ford substation in Cherokee County, with 560 MW still available and being determined for deployment. That puts Georgia Power on track to own and operate a total of 915 MW ...
