At GreenGo Energy, we are highly specialized in renewable energy solutions. Our core competence is developing and building tailored renewable energy solutions, which ensure green and stable returns for our clients. We handle the whole process from beginning to end, and all relevant skills are available in-house.

How we work

GreenGo Energy was founded in 2011 with the vision to accelerate the conversion to renewable energy generation, by an innovative and scalable business model. GreenGo Energy's 360-degree full services platform includes project origination, investment structuring, development, offtake, EPC management and asset management services, fully ...

Power-to-X (PtX) is an innovative approach to energy conversion that plays a pivotal role in the global transition towards a greener, more sustainable energy system. At its core, PtX technologies convert renewable electricity into other forms of energy carriers, such as hydrogen, synthetic fuels, chemicals, or heat. ...

GreenGo Energy Group ...

GreenGo Energy has worked since 2011 to accelerate the green transformation through a distinguished, innovative and scalable business model based on renewable energy. We are a company built around technology, and we have a strong passion for leading the energy transformation on a grand scale.

Depuis 2011, GreenGo Energy travaille à accélérer la transition écologique grâce à un modèle économique novateur, modulable et différent, fondé sur l'énergie renouvelable.
