

Ghana orca energy

Does Orca supply natural gas?

In 2009 Orca commenced a compressed natural gas pilot project to supply gas to converted vehicles, as well as off network business that wanted gas for heating or cooking. As demand for gas continues to increase, the Company is actively evaluating options to increase and sustain supply to support the nation.

Why is Orca a sustainable company?

The Company aims to create long-term sustainable and accretive value for our stakeholders, while minimizing its impact on the environment. Orca is focused on maintaining safe and reliable operations at the Songo Songo gas field, offshore Tanzania.

What is Orca doing now?

In the long term, subject to 3D seismic results and contractual conditions, Orca aims to increase its sales volumes and expand its industrial gas distribution to displace higher carbon based and more expensive energy alternatives. Today, Orca is focused on sustaining current demand to support critical power generation and industrial demand.

What does Orca do?

Orca aims to have a positive impact on its country of operations, its people and the population whom we operate alongside, while reliably supplying natural gas to support Tanzania's power and industrial growth in a bid to help the nation transition towards a lower carbon economy.

How does Orca contribute to Tanzania's transition to a lower carbon economy?

Orca seeks to minimize its environmental impact, reduce the emissions intensity of its operations, and to significantly contribute to Tanzania's transition away from more carbon intensive sources of energy, towards a lower carbon economy.

What makes Orca a good company?

Orca seeks to bring positive change to the local communities where it operates, and also looks to empower its local workforce. Ensuring a high level of governance and oversight is one of the top priorities for the Company.
